0.1 Split code for PICs

your fixed code that are *only* called by the replaceable code. You will need a **GLOBAL** directive for any symbol referenced in this file. Compile this file using a command like,

```
PICC -17C756 -C callgrph.as
```

```
-ACODE=4000h-5FFDh
```

The ROMDATA class is changed so that it only uses the external memory ROM space of 8000h - BFFFh.

```
-AROMDATA=8000h-BFFFh
```
